**RE: Letter of Support  
FY2025 - Energy & Water (E&W) Regional Water Resources  
Funding Request**

Dear Congressman Kelly,

Please accept this letter of support to improve the regional water resources in the Lafayette-Oxford-University (LOU) community. We fully support the City's request of a \$3 million funding allocation from the U.S. Congress through the Energy & Water Appropriations legislation. It is our understanding this funding would be allocated to critical water resources for the City of Oxford including water distribution and supply, stormwater improvements and/or wastewater needs.

It has become evident in the recent years that a comprehensive approach to watershed management is necessary to serve growing areas of need in the LOU community. This proposed funding will help address the immediate needs along with future demand and will compliment efforts already underway by the City.

Thank you for your efforts to help address this important quality of life area of need. We are appreciative of your support of Mississippi's 1<sup>st</sup> Congressional District.

Sincerely,

Lisa Carwyle  
County Administrator

RE: FY2025 Energy & Water Community Funding Request  
Oxford Regional Water Resources Program

Dear Congressman Kelly:

On behalf of the City of Oxford, please accept this correspondence as an official Letter of Support for a Community project funding allocation as part of the FY2025 Energy & Water (E&W) appropriations process. Oxford continues its comprehensive approach for the development of capabilities for water, wastewater service, non-point and stormwater management within the City and contiguous areas. Oxford is very appreciative of your strong support for including a Section 219 provision in the 2022 Water Resources Development Act (WRDA) that authorized \$10 million for Oxford's Environmental Infrastructure program. To this end, the requested funding allocation of \$3 million will allow for the implementation of critical water supply improvements that consist of water resource elements to include water and stormwater infrastructure to include wells, storage tank, associated pipelines and facilities that will provide service to Oxford and surrounding community.

As part of this request, the City of Oxford is committing 25% local match to the requested amount that equals \$1,000,000.00 as a partnering endeavor with the Federal Government to improve water resources for the region.

The City appreciates your consideration of this request and will be glad to provide additional information or address further questions as needed.

Sincerely,

Robyn Tannehill  
Mayor
